

**Randy Clark**

*NSC Vice Chair*

Verizon Enterprise Solutions  
Client Partner, Defense & National Security

Mr. Clark's current role as Client Partner, Verizon Enterprise Solution, is focused on Defense & National Security Agencies. In his role he leads the development and integration of complex telecommunications solutions across wireline & wireless product portfolios, with focus on Private LTE/5G, Private IP, and Secure Cloud Connect. He also continues his leadership in Software Defined Perimeter (SDP), a disruptive Zero Trust cyber security architecture.

Mr. Clark held executive positions at SARCOS Robotics and Oceus Networks where he managed strategic programs and business development initiatives. Mr. Clark also served as a Business Analyst for Headquarters Air Force Pentagon - Logistic, Engineering, and Force Protection Policy Advocacy (HAF/A4PA).

Mr. Clark is an active member of AFCEA International Technology Committee, past Chairman of the AFCEA DC Mobile Working Group, as well as a former participant in the FCC TAC.

Mr. Clark's 29 years in communications originated as an electronics technician for Tactical Air Operations Command, United States Marine Corps, which transitioned to pioneering Custom Networks Solutions for Nextel Communication.
