

National Spectrum Consortium Announces 2022 Executive Leadership Committee and New Chair and Vice-Chair

SUMMERVILLE, S.C. -- The National Spectrum Consortium (NSC) has elected four new industry professionals to its Executive Committee (ExCom) and selected a new Chair, Federated Wireless Vice President and General Manager Salvador D'Itri and a new Vice Chair, Georgia Tech Center for Advanced Communications Policy Director of Digital Transformation Dr. Jeff Evans.

The newly elected ExCom members are:

- Dr. Sheryl Genco (Ericsson), representing Large, Non-Traditional Businesses
- Erik Perrins (University of Kansas), representing Academia, Non-Traditional Businesses
- Paul Steinberg (Motorola Solutions), representing At-Large Traditional Businesses
- Kamran Mahbobi (MaXentric Technologies, LLC), representing Small, Non-Traditional Businesses

"We are thrilled to welcome our new ExCom members, Chair and Vice-Chair," said Interim NSC Executive Director Tony Melita. "I am confident they will bring leadership and industry expertise to advance National Spectrum Consortium's priorities in 2022 and beyond."

The NSC works to advance the development of next-generation spectrum technologies in order to provide warfighters with an innovative edge on the battlefield. The ExCom guides this work and ExCom members are elected from the NSC membership to serve three-year terms.

"I'm excited to take on the role of NSC Chairman working with Jeff Evans and collaborating with our industry partners, government officials and academic leaders to advance spectrum technologies and wireless communications," said Salvador D'Itri.

About the National Spectrum Consortium

The National Spectrum Consortium (NSC) provides the Government direct access to over 440 members of U.S. industry and academia who work with systems, sub-systems, components and the enabling technologies related to the use of the electromagnetic spectrum or the information that rides on it. The majority of Consortium members are small businesses, and over 75% are principally focused on commercial markets. Membership spans the continuum of basic research through large-scale production, enabling the formation of purpose-built teams tailored to the development phase(s) of most interest to the sponsor.
