

NSC Commends NTIA for Request for Comment on Open RAN

This [Request for Comment](#) is an important step toward strengthening, protecting and expanding our networks. Open Radio Access Networks (Open RAN) offer great opportunities for collaboration and innovation in the field that will help the United States remain competitive. The National Spectrum Consortium (NSC) and our recently formed Open RAN Advisory Group look forward to providing comments to NTIA about how our members can work together around Open RAN efforts.

For NSC members interested in getting involved in the Open RAN Advisory Group, please contact NSC Executive Director Joe Kochan at Joe.Kochan@nationalspectrumconsortium.org.
